DAYS STEP STOOL WITH HANDRAIL

\$164.99

Provides safer access to higher surfaces at home or in care settings.

The Days Step Stool with Handrail supports safer access to elevated surfaces such as cupboards or beds. Its non-slip design and stable construction assist people who need extra height and balance support.

PRODUCT DESCRIPTION

The Days Step Stool with Handrail offers a safe and stable way to reach higher surfaces in bathrooms, kitchens or bedrooms. It features a non-slip rubber platform and handrail to assist with stepping and standing tasks.

Constructed from chrome-plated steel, the stool is designed for durability and everyday use. The large textured step surface and rubber-tipped feet provide extra traction and help protect flooring. Its compact footprint fits easily into most home or care environments.

Ideal for people with limited mobility or strength, the stool supports confident, independent movement during daily activities.

Who it's for

- For clients who require secure height assistance for daily activities.
- For therapists supporting clients in adaptive equipment use or home safety planning.
- **Non-slip rubber surface** - enhances safety while stepping or standing
